# Gouri Yadav

+91-7805001521 | gouriy2414@gmail.com | LinkedIn | GitHub | LeetCode

## SUMMARY

Computer Science Engineering student and full-stack developer with experience building responsive, scalable web applications and enterprise content-management systems using React, Next.js, TypeScript, Node.js, and Express.js. Skilled in integrating REST APIs, designing role-based access systems, and delivering production features in agile, cross-functional teams.

## EDUCATION

**Sushila Devi Bansal College of Technology, Indore · B.Tech in Computer Science Engineering** **2022 – 2026**

*RGPV University · CGPA: 7.30*

**School of Excellence, MP Board** **2019 – 2022**

*Class XII: 79.6% · Class X: 89.66%*

## PROFESSIONAL EXPERIENCE

**Frontend Developer Intern · XenParkSolutions** **Aug 2025 – Dec 2025**

- **Developed** responsive, user-friendly UI components for client and internal projects using Angular and modern frontend practices.
- **Integrated** frontend components with backend services through REST APIs in collaboration with backend developers.
- **Applied** Git and GitHub workflows for version control, code collaboration, and maintainable code history.
- **Tested, debugged, and optimized** frontend code to improve usability, performance, and user experience.

## PROJECTS

**Media Octus CRM — OOH Advertising CRM Platform** **Full-Stack Application**

- **Built** a full-stack, role-based CRM platform (Admin, Manager, HR, User roles) for out-of-home advertising operations, with a Node.js/Express/TypeScript backend and a Next.js 16 (App Router) frontend styled with Tailwind CSS.
- **Designed and implemented** a modular backend architecture (Model → Service → Controller → Routes → Validator) across multiple feature modules, following team-defined coding standards.
- **Implemented** JWT-based authentication with role-based access control (RBAC), secure password hashing (bcrypt), and protected API routes.
- **Developed** the HR Attendance module — GPS-based check-in/check-out, shift-configuration logic, and automated late-arrival flagging using MongoDB unique-index constraints to prevent duplicate records.
- **Enforced** server-side input validation with Zod and scoped database queries to isolate data access by user role, preventing cross-user data leakage.
- **Structured** the frontend using a feature-based module pattern (API layer, custom hooks, reusable components) consuming typed REST API responses.

*Node.js · Express · TypeScript · MongoDB · Next.js · Tailwind CSS · JWT · Zod*

**Tyler Content Manager (TCM)** **Enterprise Content Management Platform**

- **Developed and enhanced** Tyler Content Manager (TCM), an enterprise-grade content management solution integrated with seven Tyler products — including Municipal Justice/ERP Pro, School ERP Pro, Enterprise Assessment & Tax, and Enterprise Permitting & Licensing — supporting 3,000+ customers.
- **Engineered** core functionalities for content capture, management, delivery, automation, and secure storage, improving cross-platform document workflows and performance.
- **Built** robust frontend components in Angular, interfaced with a Spring Boot middleware, and optimized Java-based backend services for scalability and maintainability.

- **Exposed** existing business logic through OData REST APIs, enabling seamless interoperability across Tyler's product ecosystem, and implemented OpenSearch for advanced search and indexing.
- **Owned** front-end architecture decisions, led PR reviews, and collaborated in an agile environment on requirement gathering and client interaction.

*Angular · Vaadin · Java · OData · OpenSearch · SQL Server · PDFTron*

**Company HRMS / CRM Platform** **Full-Stack Application**

- **Fixed** critical bugs and resolved production issues in the company's internal HRMS/CRM platform, improving stability and user experience.
- **Implemented** small feature enhancements and UI improvements based on client and QA feedback.
- **Collaborated** with the development team to test, debug, and deploy fixes for real-time modules using Socket.io.

*React · Node.js · Express · Socket.io · MongoDB · Nginx*

**AI Code Debugging Assistant** **Web Application**

- **Designed and developed** an AI-powered web application that analyzes code, detects errors, and generates real-time debugging suggestions to help users fix issues faster.
- **Built** a responsive interface with React.js and Tailwind CSS using reusable components and structured error-boundary handling for a smooth user experience.
- **Integrated** the frontend with backend services through REST APIs to support fast, reliable data communication between the AI engine and the UI.

*React.js · Node.js · Express.js · JavaScript · Tailwind CSS · REST APIs*

## TECHNICAL SKILLS

**Languages:** C/C++, JavaScript, TypeScript

**Frontend:** HTML5, CSS3, React, Next.js, Angular, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs, Socket.io

**Databases:** PostgreSQL, MySQL, MongoDB, SQL Server

**Tools:** Git, GitHub, Postman, Docker, Nginx, Visual Studio Code

## ACHIEVEMENTS & ACTIVITIES

- Participated in a debugging competition at Sushila Devi Bansal College of Technology.
- Participated in the Heritage Quiz and sports activities.
- Completed HackerRank practice and certification activities.
